

Company Profile

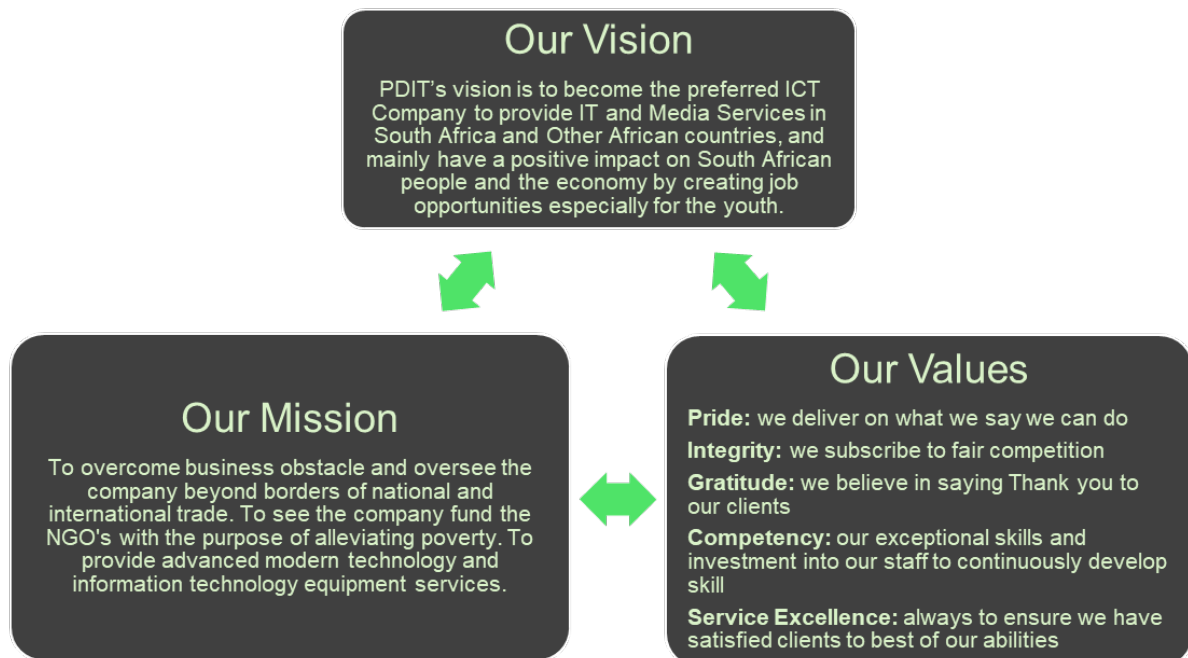

Founded in 1998 **PDIT Cape Town** is proudly South African, reflecting our commitment to transformation with a 100% Black Ownership and acquiring the SANAS accredited Level 1(one) BBBEE rating.

PDIT Cape Town's administrative premises are located at 76 Murray Street, Vasco, Goodwood, Cape Town, with further regional and national presence, Western Cape | Gauteng | Kwa-Zulu Natal and the Eastern Cape, enabling us to provide a national service to our client base.

Initially an Information Communications Technology (ICT) Security Company specialising in the Security, Risk Management and Loss Control fields, PDIT CT has extensive experience in providing innovative and integrated **Enterprise Wide Security Management IT Solutions** in South Africa and abroad.

We deliver world-class, integrated solutions to meet the diverse requirements of our clients, catering for the needs of large corporate companies, government bodies and the SME sector alike.

We have successfully completed a number of large projects in various centres in South Africa and have subsequently successfully negotiated various prestigious maintenance contracts. (SLA's)

1. Security & Display Solutions

Our solutions are installed on the Campus environments of the **Parliamentary Precinct** in Cape Town, encompassing nine buildings, **2 Military Hospital**, **City of Cape Town**, **EOH**, **Broll Property Management**, **Bloemhof Depot**, **University of Fort Hare**, **British Petroleum** Cape Town and Johannesburg and the **Department of Public Works**, Eastern Cape and KwaZulu-Natal, amongst others, with comprehensive maintenance and support contracts (SLA's) spanning several years with each client.

- **Enterprise Security Management**
Our solution seamlessly integrates Access Control Management, Alarm Monitoring, Live Video CCTV Monitoring, Elevator Control, Parking Control, Building Systems Control and Intercom Interface.
- **Asset Tracking and Asset Control**
Our solution is based on Wavetrend's Active RFID technology. Long read ranges, the ability to perform in harsh, wet environments and the ability to transmit data make active RFID ideal for applications in aviation, construction, defence, healthcare, transport and office environments to track laptops and other valuable items.
- **Security Inspection Solutions**
Our core offering centres on Full Scanning Technology. Solutions include amongst others Passive Millimetre Wave and X-ray Full Body Scanning, Large Truck Container / Vehicle Inspection, Baggage and Luggage Monitoring, Liquid Security Inspection System, Radioactivity Monitoring portals for personnel and vehicles, Explosives/Drug Inspection System.
- **Display Solutions and Integration**
Our Display Solution include the latest display technologies that ranges from: LED's outdoor and indoor | Commercial Displays 24/7 365days, Video Wall's & Hotel TV's.
- **Software Display Technologies – Signage & IPTV**
The software is being developed by south African engineers since 2006. The software solution is for the scheduling, management and distribution of rich digital media, to in-venue networks through TCP/IP links and displayed on local digital display devices for community television. Our X-Stream software integrate with most of the systems that include Air Ports Flight information | FIDS on Television

In addition to the ICT Security Solutions and Electrical and Automation Services, PDIT CT is proud to offer the following additional broad ranging skills and services:

- Auditing and Consultation
- Integrated Fire and Safety Systems
- Information Communication Technology and Security Integration
- Control Instrumentation and Automation
- Building Safety Advisory
- Building / Installation and Civil Works
